I am writing to express my sincere gratitude to Rose's journey scholarship Fund of Clarke International University for making this Scholarship award possible. I was thrilled to learn of my selection for this honor, and I am deeply appreciative of your support.

My name is Kwagalakwe Joseph Bugembe, a Third-year medical student at CIU currently pursuing a bachelor's degree in Medical Laboratory Science (BMLS) as my major. I am also a Member of Parliament BMLS at CIU under the students' Guild council and also very passionate about music, dance and drama, sports and innately resilient leadership.

I hope and I believe am going to become an exceptional Medical Scientist upon graduating from CIU just a year from now. I also look forward to furthering my studies in the nearby future and become a recognized Doctor of Medical Science with specialization in Immunology and Pharmacology with an inspiration to find a solution to the growing burden of recent diseases like cancers in our recent times because I believe there is a lot to explore for diagnostic and treatment trends if we embrace change today.

A scholarship is a splendid opportunity for oneself because it enables students like me to obtain education they may not have had access to otherwise. Scholarships go farther than being financial aid for students, but they reward deserving students with the ability to afford higher education.

I am so thankful and humbled by your generosity and support and I take this opportunity to acknowledge the Clarke International university Beloved Vice Chancellor, Dr. Rose Nanyonga Clarke for her relentless support network to many CIU students and believing in young people like me.

I promise you that I will work very hard as expected of me because over the recent years at campus , I have realized that resilience amidst adversity is one of my greatest pillars in life through the successes of my efforts and having hope for a better tomorrow ;this has been evidenced by my flourishing in school , leading student based activities and taking role in community service and as a medic activist, I will always promote human health, hygiene, nutrition and uplift the standards of our communities in addition to cooperation with other organizations with similar objectives to bring about the difference we need in our communities .

I believe any challenge in life should not be a barrier but rather a launching pad to motivate and propel us to our success, Amen!

I LEAD, INNOVATE AND TRANSFORM. I AM CIU. Shalom!!
